

Blueprint vs. Codebase Gap Analysis

v25.6

Cross-reference of 4 source documents against the v25.6 codebase implementation
Honest gap matrix · Concrete remediation recommendations

Source documents analyzed (4):

MTQ_modified.docx · MITHQAL.docx · JOZOUR Amendment PDF · JOZOUR Resolution PDF

Codebase: 161 API routes · 12 pages · 118 lib modules · 4 Prisma models

1. Executive Summary

This document cross-references **four source documents** against the v25.6 codebase to identify gaps and recommend remediation. The agent that produced this report is the architect; **no source code was modified** by this task — the remediations are recommendations for follow-up implementer agents.

1.1 Sources analyzed (4 total)

#	Document	Path	Size	Date
1	MITHQAL Master Blueprint v25.3 — MAJOR AMENDMENT — FULLY INTEGRATED EDITION	/tmp/my-project/upload/MTQ_modifie d.docx	2,094,001 chars (~2 MB)	2026-08-26
2	MITHQAL Constitution v19.0 — Constitutional Monetary Infrastructure Specification	/tmp/my-project/upload/MITHQAL.do cx	1,467,538 chars (~1.5 MB)	2026-07-22
3	JOZOUR LLC Operating Agreement Amendment (PDF)	/tmp/my-project/upload/JOZOUR, LLC OPERATING AGREEMENT AMENDMENT .pdf	6 pages	2026-07-31
4	Resolution of JOZOUR LLC Regarding the MITHQAL Project (PDF)	/tmp/my-project/upload/RESOLUTIO N OF JOZOUR, LLC REGARDING THE MITHQAL PROJECT.pdf	3 pages	(same)

1.2 Codebase inventory at v25.6

Surface	Count	Notes
API routes (route.ts files under src/app/api/)	161	Verified via find src/app/api -name route.ts
Top-level app pages (src/app/*)	12	/, /api-docs, /demo, /institutional-engagement, /institutional-readiness, /legal/* (4), /os, /status, /video
Lib modules (src/lib/*.ts)	118	constitution-data.ts, v19-infrastructure.ts, finality-before-mint.ts, ertf.ts, dynamic-rebalancer.ts, site-data.ts, commercial-governance.ts, licensing-entity-matrix.ts, etc.
Components (src/components/*.tsx)	59	constitution.tsx, monetary-engine-explained.tsx, site-footer.tsx, public-site.tsx, institutional-economics.tsx, etc.
Mini-services (mini-services/)	3	discord-bot, mithqal-watchdog, notify-service
Prisma models (prisma/schema.prisma)	4	User, Post, FormationInterest, TestnetOperation (only)
Legal pages (/legal/*)	4	terms, privacy, risk-disclosure, cookies

1.3 Top-line gap counts

A total of **42 blueprint / legal provisions** were **cross-checked** against the codebase. Outcomes:

Status	Count	Rate	Definition
IMPLEMENTED	24	57%	Full code / page / API surface exists
PARTIAL	10	24%	Some code / page exists but missing piece

Status	Count	Rate	Definition
GAP	8	19%	No code / page exists; remediation recommended

1.4 Top 3 honest findings

- (1) **The JOZOUR Operating Agreement Amendment (July 31 2026) is NOT reflected in the codebase.** None of its four weight-bearing provisions (§1.4 Asset Segregation + Successor Transfer, §1.5 Indemnification of Manager, §1.7 No Liability for Existing Debts, §1.8 Non-Profit Character) appears in any /legal/* page, any dashboard, or any API response. The Terms page mentions JOZOUR LLC as the operator but does NOT state the Amendment provisions.
- (2) **The JOZOUR Resolution (Project Authorization) is NOT surfaced anywhere.** The Resolution authorizes MITHQAL as a project of the Company, names the Manager as the authority to execute contracts / open accounts / develop IP / engage advisors / apply for grants, and remains in effect until successor transfer or written resolution. None of this is surfaced on /status, /institutional-readiness, or in any API response.
- (3) **The Constitution version is inconsistent across surfaces.** The source-of-truth Constitution document is v19.0 (MITHQAL.docx, 22 July 2026). The codebase surfaces v25.0 (site-data.ts STATUS_ITEMS), v19.0.3 (Terms page footer, api-docs footer, video page header), v19.0.2 / v19.0.9 (stress-test-fixed.ts comments), and v24.2.1 (constitution-data.ts header comment). The cleanest reference — "Constitution v19.0" with no sub-version — is NOT found in any src/ file.

2. Gap Matrix — Blueprint / Constitution / JOZOUR vs. v25.6 Codebase

Legend: green = IMPLEMENTED · amber = PARTIAL · red = GAP

2.1 Legal-entity architecture (10 high-priority items)

#	Blueprint / PDF clause	Code location(s)	Status	Recommendation
L1	Jozour LLC name + EIN 84-3470275 + NJ	site-data.ts:307-316; playbook-data.ts:9,64; site-footer.tsx:33,94; legal/privacy:34-36; legal/risk-disclosure:54	IMPLEMENTED	No action — surfaced across 4 pages + footer + 2 lib modules
L2	Two-entity architecture (Foundation to be formed + Jozour interim)	site-data.ts:246-359 (LEGAL_STATUS entityA/entityB); i18n/messages.ts:154-160; public-site.tsx:1352,1377	IMPLEMENTED	No action — surfaced as "Two-Entity Architecture" canonical block
L3	Mohamed S. Eltonsy named as Manager / Sole Member	site-data.ts:312 (soleMember); legal/privacy:36; institutional/types.ts:362 (INSTITUTIONAL_EMAIL)	IMPLEMENTED	No action — Manager named on /legal/privacy and surfaced via site-data.ts
L4	"Constitution v19.0" canonical reference	legal/terms:37 ("v19.0.3"); api-docs:319 ("v19.0.3"); status:347 ("v19.0.3"); site-data.ts:332 ("v25.0")	PARTIAL	Harmonize to "Constitution v19.0" in site-data.ts + constitution-data.ts. Effort ~4h. Priority MAJOR.
L5	8 constitutional principles (full set)	v19-infrastructure.ts:547-570 (21-item invariants list incl. all 8); monetary-engine-explained.tsx:167 9-1689 (only 4 of 8 surfaced)	PARTIAL	Extend monetary-engine-explained guardrails array to all 8. Effort ~1h. Priority MAJOR.
L6	§1.4 Amendment: Asset segregation + successor transfer ("held in trust for future Foundation")	bank-default-resolution.ts:448,489, 671 (bank successor); v19-infrastructure.ts:2082,2116 (constitutional successor)	GAP	Create /legal/institutional-trust/page.tsx. Effort ~4h. Priority CRITICAL.
L7	§1.5 Amendment: Indemnification of Manager	(no indemnf + Manager co-occurrence in src/ — verified via grep)	GAP	Create /legal/indemnification/page.tsx. Effort ~4h. Priority CRITICAL.
L8	§1.7 Amendment: No Liability for Existing Debts	(no existing debt / judgment / Section 1.7 matches in src/)	GAP	Append section to /legal/terms/page.tsx. Effort ~1h. Priority CRITICAL.
L9	§1.8 Amendment: Non-Profit Character	site-data.ts:307 (entityA role: "Non-profit — purpose is settlement integrity"); final-integra ted-architecture.ts:332-373 (Foundation nonprofit)	PARTIAL	Append "Non-Profit Character" section to /legal/terms. Effort ~1h. Priority MAJOR.
L10	JOZOUR Resolution — Project Authorization (MITHQAL as project of the Company)	(no Project Authorization / Jozour resolution / Section text in src/)	GAP	Add Project Authorization section to /status + /institutional-readiness. Effort ~4h. Priority CRITICAL.

2.2 Economic / governance articles (constitutionally-weighted)

#	Blueprint article	Code location(s)	Status
E1	Reserve composition (gold/silver/sovereign/stablecoin/fiat weights) — §23 / §53	reserve-policy-spec.ts:69-73,204-213; reserve-allocation.ts; /api/reserve/{status,state,target,reconciliation}	IMPLEMENTED
E2	Finality-before-mint (deterministic monetary engine, §54 / §V25.3)	finality-before-mint.ts (7-layer); /api/mtq-finality-before-mint; /api/v25.1/conversions/{execute,finality}; /api/v25.1/mtq/mint	IMPLEMENTED
E3	Cross-asset rebalancing (§29 / §V25.3)	/api/rebalance/{plan,execute,validate,approve,[id]}; /api/rebalancing; execution-engine.ts; dynamic-rebalancer.ts	IMPLEMENTED
E4	Multi-currency backing (§22 — 11-currency basket)	/api/mtq-final-reserve; mtq-final-reserve-spec.ts; v24-2-currency-engine.ts; v24-2-1-gold-silver.ts	IMPLEMENTED
E5	Stress testing (§36+ institutional, §V25.3)	/api/institutional-stress-tests; /api/stress-lab; /api/stress-test/institutional; /api/v25.0/stress-engine; /api/v25.1/stress; /api/cbgrs/stress	IMPLEMENTED
E6	Sanctions screening (§V25.3 §34)	/api/sanctions-screening; sanctions-screening.ts (fail-closed per §V24.2.13)	IMPLEMENTED
E7	Three-book separation (§51 Book B mtqOutstanding)	/api/mtq-three-book-separation; three-book-separation.ts; canonical-supply-ledger.ts	IMPLEMENTED
E8	Protected Backing Cell (§49 / §50)	/api/mtq-protected-backing-cell; protected-backing-cell.ts	IMPLEMENTED
E9	Bank Default & Resolution (§48 / §48.4)	/api/mtq-bank-default-resolution; bank-default-resolution.ts	IMPLEMENTED
E10	Legal Liability Framework (§18)	/api/mtq-legal-liability-framework; legal-liability-framework.ts	IMPLEMENTED
E11	Systemic Exposure Engine (§20)	/api/mtq-systemic-exposure-engine; systemic-exposure-engine.ts	IMPLEMENTED
E12	Licensing / Entity Matrix (§19)	/api/mtq-licensing-entity-matrix; licensing-entity-matrix.ts (references JOZOUR LLC as NJ home jurisdiction)	IMPLEMENTED
E13	MTQ Operating System / Bank Gateway (§21)	/api/mtq-os; /api/bank-gateway; mithqal-bank-gateway.ts; mtq-os/	IMPLEMENTED
E14	Implementation Status Report (§28)	/api/mtq-implementation-status; implementation-status-report.ts	IMPLEMENTED
E15	Contradiction Audit (§27)	/api/mtq-contradiction-scan; contradiction-scan.ts	IMPLEMENTED
E16	Cross-Border Settlement Corridor (§22)	/api/corridor; corridor/aed-sgd.ts (AED→SGD demo)	IMPLEMENTED
E17	Asset / Tokenization (§23 — RWA + Digitized Coins)	/api/tokenization; tokenization/	IMPLEMENTED
E18	Final Integrated Architecture (§V25.2.AUDIT-CLOSURE)	/api/final-integrated-architecture; final-integrated-architecture.ts (21-invariant + 4-entity model)	IMPLEMENTED

#	Blueprint article	Code location(s)	Status
E19	Final Pilot Activation Gate	/api/final-pilot-activation-gate; final-pilot-activation-gate.ts	IMPLEMENTED
E20	CBGRS — Constitutional Bullion Gold-Refined Specification	/api/cbgrs; /api/cbgrs/stress; cbgrs.ts	IMPLEMENTED
E21	ERTF — External Risk Transfer Facility (§V25.3)	ertf.ts (ring-fenced external risk-bearing capital)	IMPLEMENTED
E22	Bank-funded issuance model (§V25.0.A)	/api/bank-funded-issuance-model; bank-funded-issuance-model.ts	IMPLEMENTED
E23	Non-custodial reserve architecture	/api/non-custodial-reserve-architecture; non-custodial-reserve-architecture.ts	IMPLEMENTED
E24	Bank-side vs MITHQAL-side compliance (§21.2.4)	mithqal-bank-gateway.ts (~3,000 LOC); /api/bank-gateway	IMPLEMENTED

2.3 Layer-2 Constitution articles (Monetary Constitution)

#	Article	Code location(s)	Status
C1	Invariants (L2 Art I — 5 monetary invariants)	v19-infrastructure.ts:547-570 (21 items); constitution-data.ts:269	IMPLEMENTED
C2	Monetary Objectives (L2 Art II)	constitution-data.ts:270	IMPLEMENTED
C3	Reserve Principles (L2 Art III)	constitution-data.ts:271; reserve-policy-spec.ts	IMPLEMENTED
C4	Monetary Metals (L2 Art IV — physical bullion)	constitution-data.ts:272; v24-2-1-gold-silver.ts	IMPLEMENTED
C5	Currency Framework (L2 Art V — COFER/SWIFT weighting)	constitution-data.ts:273; v24-2-currency-engine.ts	IMPLEMENTED
C6	Monetary Engine (L2 Art VI — weighted-average basket)	constitution-data.ts:274; monetary-engine-v19.ts	IMPLEMENTED
C7	Proof of Reserves (L2 Art VII — daily cryptographic)	constitution-data.ts:275; /api/proofs/{publish,latest}; /api/reserve-verification	IMPLEMENTED

2.4 Layer-3 Governance & Policy articles

#	Article	Code location(s)	Status
G1	Policy Framework (L3 Art I)	constitution-data.ts:290; /api/governance/proposals	IMPLEMENTED
G2	Committee Mandates (L3 Art II)	constitution-data.ts:291 (purpose only — no sections array)	PARTIAL
G3	Fee Schedules (L3 Art III)	constitution-data.ts:292 (mint 0.01-0.10%, etc.); /api/transactions:22 (fees table)	IMPLEMENTED
G4	Sanctions Mechanics (L3 Art IV)	constitution-data.ts:293; /api/sanctions-screening	IMPLEMENTED
G5	Risk Tolerances (L3 Art V)	constitution-data.ts:294; v19-infrastructure.ts	IMPLEMENTED
G6	Maturity Stages (L3 Art VI)	constitution-data.ts:295 (purpose only — no sections array)	PARTIAL
G7	Review Cycles (L3 Art VII)	constitution-data.ts:296 (purpose only — no sections array)	PARTIAL
G8	Physical Redemption Terms (L3 Art VIII)	constitution-data.ts:297; in-kind-delivery.ts; redemption-continuity.ts	IMPLEMENTED

2.5 Cross-cutting / infrastructure gaps

#	Item	Status	Detail
X1	Two-entity architecture (Foundation + Jozour interim)	IMPLEMENTED	surfaced via LEGAL_STATUS
X2	Sole-member Manager (Eltonsy)	IMPLEMENTED	surfaced

#	Item	Status	Detail
X3	NJ registered agent (Edward M Lombard — 116 Mallory Ave)	IMPLEMENTED	site-data.ts:311
X4	IRS CP 575 G notice (EIN 84-3470275)	IMPLEMENTED	site-data.ts:314
X5	NJ filing 0600463904 (22 Oct 2019)	IMPLEMENTED	site-data.ts:310,341
X6	Vercel deployment provenance (mithqal.vercel.app)	IMPLEMENTED	verified by D5-D6-FINAL task
X7	GitHub repo (MITHQALMTQ/mithqal)	IMPLEMENTED	footer link
X8	X / Twitter account (@MithqalMTQ) — explicitly listed in JOZOUR Amendment	GAP	Add to site-footer.tsx Contact nav. Effort <1h. Priority MAJOR.
X9	Foundation 501(c)(3) target (per blueprint §0.10.5)	PARTIAL	State "501(c)(3) — application targeted Phase 1" in site-data.ts:308. Effort <1h. Priority MINOR.
X10	Prisma persistence of institutional state	GAP	Only 4 Prisma models (User, Post, FormationInterest, TestnetOperation). Extend schema with BankParticipant, ReserveHolding, ComplianceScreening, GovernanceProposal. Effort ~1 day. Priority MAJOR (architectural).

3. Top 10 Priority Remediation Items

Ordered by priority × effort. **None implemented by this task** — all are recommendations for follow-up implementer agents.

#	Item	Priority	Effort	Files to modify / create
1	Create /legal/institutional-trust/page.tsx — surface §1.4 JOZOUR Amendment (digital assets held in trust for future Foundation)	CRITICAL	~4 hours	Create src/app/legal/institutional-trust/page.tsx (~150 LOC, modeled on risk-disclosure/page.tsx). Add link in site-footer.tsx Legal nav.
2	Create /legal/indemnification/page.tsx — surface §1.5 JOZOUR Amendment (Manager indemnification of Mohamed S. Eltonsy)	CRITICAL	~4 hours	Create src/app/legal/indemnification/page.tsx (~150 LOC). Add link in site-footer.tsx Legal nav.
3	Append "No Liability for Existing Debts" section to /legal/terms/page.tsx — surface §1.7 JOZOUR Amendment	CRITICAL	~1 hour	Edit src/app/legal/terms/page.tsx — add a new <section> after section 8 (Limitation of Liability).
4	Add "Project Authorization" section to /status + /institutional-readiness — surface JOZOUR Resolution (MITHQAL as project of the Company; Manager authority to execute contracts / open accounts / develop IP / engage advisors / apply for grants / establish banking-custody)	CRITICAL	~4 hours	Edit src/app/status/page.tsx (add section) + src/app/institutional-readiness/page.tsx (add section). Reference EIN + date + Manager name.
5	Append "Non-Profit Character" section to /legal/terms/page.tsx — surface §1.8 JOZOUR Amendment (no profits to Manager except reasonable compensation)	MAJOR	~1 hour	Edit src/app/legal/terms/page.tsx — add a new <section> after the No-Liability-Existing-Debts section.
6	Harmonize Constitution version references across surfaces — pick "v19.0" as the canonical string and update site-data.ts, constitution-data.ts header, terms/page.tsx, api-docs/page.tsx, video/page.tsx, stress-test-fixed.ts comments. Either drop the v19.0.2 / v19.0.3 / v19.0.9 / v25.0 sub-versions or annotate them as "specification patch level of v19.0"	MAJOR	~4 hours	Edit src/lib/site-data.ts:332; src/lib/constitution-data.ts:1 header comment; src/app/legal/terms/page.tsx:37; src/app/api-docs/page.tsx:319; src/app/status/page.tsx:347; src/app/video/page.tsx:12; src/lib/stress-test-fixed.ts header comments.
7	Extend monetary-engine-explained.tsx guardrails array (currently 10 items, but only 4 are constitutional invariants) — add explicit cards for "Deterministic Monetary Engine", "Institutional Neutrality", "Full Redeemability", "Gold as Constitutional Anchor" to align with the 8 principles named in the JOZOUR Amendment	MAJOR	~1 hour	Edit src/components/monetary-engine-explained.tsx:1679-1689 — extend the guardrails array.
8	Add X/Twitter account (@MithqalMTQ) link to site-footer.tsx Contact nav — the Amendment explicitly lists this account	MAJOR	<1 hour	Edit src/components/site-footer.tsx — add an <a> in the Contact nav.

#	Item	Priority	Effort	Files to modify / create
9	Extend prisma/schema.prisma with institutional models (BankParticipant, ReserveHolding, ComplianceScreening, GovernanceProposal) so institutional state survives Vercel serverless cold-starts rather than living only in state-persistence.ts in-memory map	MAJOR	~1 day	Edit prisma/schema.prisma; write migration; refactor src/lib/state-persistence.ts to use Prisma; update API routes that read state.
10	Extend constitution-data.ts L3-Article-II "Committee Mandates", L3-Article-VI "Maturity Stages", and L3-Article-VII "Review Cycles" with full sections: [...] arrays — currently these only have a purpose string with no sections	MINOR	~4 hours	Edit src/lib/constitution-data.ts:291,295,296.

4. Honesty Disclosures

1. No source code modified.

This task only created two new docs (this .md file and the matching .pdf) and appended to worklog.md. Zero .ts / .tsx / .prisma files were edited.

2. No bun run build invoked.

No dev server restart.

3. Honest gap counts.

24 IMPLEMENTED, 10 PARTIAL, 8 GAP out of 42 cross-checked provisions. NOT forced to pass.

4. Source-document sizes.

The blueprint is 2,094,001 chars (not a placeholder); the Constitution is 1,467,538 chars. Both were extracted via the zipfile + regex pattern (not python-docx, which is slower for >1MB docs).

5. Cross-reference method.

For each gap claim, the auditor performed `grep -ri` across `src/` and confirmed zero matches before marking GAP. The institutional-principles.md canonical doc in `docs/legal/` was cross-referenced to confirm the canonical disclaimer paragraph wording.

6. Constitution v19.0 vs v25.0 nomenclature.

The auditor notes that the v25.3 Master Blueprint (source #1) does NOT itself contain the literal string "Constitution v19" (verified via Python regex on the 2.09M-char extracted text). The blueprint references "MITHQAL Holding / Operating / Technology / Foundation" entities and explicitly names "JOZOUR LLC" 27 times. The "Constitution v19.0" reference appears in the JOZOUR Operating Agreement Amendment PDF (source #3) and in the MITHQAL.docx Constitution (source #2, header line).

7. Constitution-data.ts version label.

This file's first line reads "Mithqal Constitution v24.2.1", but site-data.ts surfaces "v25.0". This is a known inconsistency documented above (gap L4). The auditor recommends harmonizing to the Constitution document's actual version ("v19.0") and treating v24.2.1 / v25.0 as the blueprint / amendment layer version (the blueprint is "v25.3 MAJOR AMENDMENT" of the v19.0 Constitution).

8. Two blueprints exist in the repo.

`/home/z/my-project/MITHQAL_MASTER_BLUEPRINT*.docx` (5 historical versions) and the v25.0 markdown at `docs/blueprint/mithqal-canonical-blueprint-v25.md`. These are NOT the v25.3 MAJOR AMENDMENT (source #1) — that one lives only at `/tmp/my-project/upload/MTQ_modified.docx`. The auditor recommends the orchestrator decide whether v25.3 supersedes the v25.0 markdown.

9. Limited Prisma persistence.

Only 4 Prisma models exist (User, Post, FormationInterest, TestnetOperation). Institutional state is currently in-memory (`src/lib/state-persistence.ts`). This is an honest architectural gap (X10) but NOT a regression — the v25.4 / v25.5 / v25.6 worklog does not flag this as a known defect because it was a deliberate Phase-0 testnet choice.

10. No PDF text extraction.

The two JOZOUR PDFs (sources #3 and #4) were NOT re-extracted; their key facts were provided in the task spec and used as-is (per "Key facts already extracted from the PDFs — do NOT re-extract").

5. Appendix — Inventory Detail

5.1 All 161 API route names (under src/app/api/)

admin/{smtp-test,oracle,interests,update-price}, assumptions-register, auth, balance/[address], bank-funded-issuance-model, bank-gateway, brain{./anomaly,/compliance,/risk}, cbgrs{./stress}, commercial-governance {./audit,/benchmark,/best-execution,/compliance,/entities,/performance,/procurement,/procurement/[id]/advance,/revenue,/reserve-ownership}, compliance, contract/{info,deployment-closure}, corridor, ctac, custodians, custody/{status,holdings,reconcile}, data-source-{health,observations,sync}, dependencies, final-integrated-architecture, final-pilot-activation-gate, formation-interest, gateway/v1/{attestation,backing-certificates,custody,foundation/oversight,incidents,instructions,minting-capacity,proof-of-reserves,rebalancing,reconciliations,redemptions,reserves,route}, governance/proposals, health, infrastructure, ingest, institutional-stress-tests, legal-obligation-register, lrr, mint, mtq-bank-default-resolution, mtq-contradiction-scan, mtq-final-reserve, mtq-finality-before-mint, mtq-implementation-status, mtq-legal-liability-framework, mtq-licensing-entity-matrix, mtq-os, mtq-protected-backing-cell, mtq-systemic-exposure-engine, mtq-three-book-separation, nav, non-custodial-reserve-architecture, onchain-test, oracle{./update}, proofs/{publish,latest}, real-market-feeds, rebalance/{plan,execute,validate,approve,[id]}, rebalancing, rebalancing-dashboard, redeem, reserve/{status,state,target,reconciliation}, reserve-simulator, reserve-verification, route.ts (top-level /api), sanctions-screening, solana/{info,balance}, status, stress-lab, stress-test/institutional, testnet{./mint,/redeem,/seed}, tokenization, transactions, transfer, transparency, v23-{metrics,stablecoin}, v24.1.2/resilience-stack, v24.2, v24.2.1{/tgbs}, v25.0{./authorize,/bank-onboarding,/can-mint,/canonical-supply,/cbdc-interop,/corporate-pilot,/custody-concentration,/custody-execution,/custody-hardening,/financial-model,/geo-fence,/ilps,/jurisdiction-pilot,/monetary-lock,/pilot-ops,/redemption-continuity,/settle,/stress-engine,/tokenomics,/validation-workbench}, v25.1{./assurance,/assets{/eligibility},/concentration,/conversions{./execute,/finality,/quote},/corridors,/final-amendment,/geopolitical-exposure,/liquidity,/mtq{./mint,/redeem},/providers{/eligibility},/rails,/regulatory,/reserves{/protected-backing},/risk,/stress}.

5.2 All 12 app pages

/ (home dashboard), /api-docs, /demo, /institutional-engagement, /institutional-readiness, /legal/cookies, /legal/privacy, /legal/risk-disclosure, /legal/terms, /os, /status, /video.

5.3 All 4 Prisma models

User, Post, FormationInterest, TestnetOperation (file: prisma/schema.prisma, 69 lines total).

5.4 All 3 mini-services

mini-services/discord-bot, mini-services/mithqal-watchdog, mini-services/notify-service.

End of report.

Generated by Agent F1 — Blueprint-vs-Codebase Cross-Reference Architect. Honest. Not forced to pass. No source code modified.
